Profile

I am an energetic and enthusiastic problem solver, dedicated to embracing challenges and pushing the boundaries of my work. With a strong foundation in Core Java and a flair for full stack development, I approach each task with maturity and responsibility. As I step into the deployment phase of my career, I'm excited to contribute my skills and passion to innovative projects that make a real impact.

Operating System, OOPs, DBMS, Computer Networks.

Projects

E-Commerce Website | *HTML, CSS, JavaScript, Bootstrap*

- Designed a responsive layout to accommodate various screen sizes.
- Created detailed product pages with HTML and CSS, showcasing product images, descriptions, specifications and reviews.
- Developed shopping cart functionality, enabling users to add, remove and update items dynamically using JavaScript.
- Collaborated with designers and back-end developers to integrate front-end components seamlessly.

Handicraft Website | *React.js, Node.js, CSS, Bootstrap*

- A simple online shopping showcasing the use of React.JS, CSS and JavaScript.
- Handicraft is about processing materials by hand with hand tools. The results can be helpful things or decorative things. I undertook a dynamic project to develop a cutting-edge online shopping site.
- Used SCSS for designing purpose.

Snake Game | *HTML, CSS, JavaScript*

- A simple game showcasing the use of HTML, CSS and JavaScript.
- Adding to the responsive design, the use of Emojis have been made to make it more interactive.
